Description

The roof bracket is designed for the JUMBO Flex Facade Scaffold, allowing for the effective creation of a covering on the scaffold. This is ideal for protecting work from the elements or creating a sheltered workspace. The JUMBO Flex Facade Scaffold is known for its versatility, with easy and quick assembly and disassembly. The scaffold is constructed with fully welded frames in tube dimensions Ø50x2mm and impact-resistant claws on diagonals and handrails, ensuring a strong and stable structure. The roof bracket is made from aluminium alloy 6005 T6, combining high strength with low weight, making it easy to handle and reliable in use.
