Description

This 2 metre top frame is designed to extend the JUMBO Flex Facade Scaffold in height, making it possible to adapt the scaffold for larger projects where additional working height is required. The JUMBO Flex Facade Scaffold is known for its versatility and easy assembly, and this top frame is no exception. The frame is made from aluminium alloy 6005 T6, which combines high strength with low weight, making it easy to handle while ensuring a stable construction. With fully welded frames in tube dimensions Ø50x2mm and impact-resistant claws on diagonals and handrails, the top frame provides a strong and reliable foundation for your scaffold.
