Description

The Combiflex pallet is designed for the secure storage and transport of scaffolding parts for the JUMBO Combiflex system. This storage solution is ideal for keeping the construction site organised and ensuring all components are easy to locate and transport. JUMBO Combiflex is a robust façade scaffolding system made from hot-dip galvanised high-quality steel, known for its high strength and low weight. The scaffolding can be constructed at any angle, 360 degrees around, and can support up to 8 components at each node, making it extremely flexible.
