Description

This diagonal brace is made of hot-dip galvanized high-strength steel, specifically designed for use in JUMBO Masonry Scaffold. With a length of 2.29 meters without a spacer, it provides the necessary stability and safety in scaffold construction. The hot-dip galvanized coating ensures long-lasting corrosion protection, making this product ideal for demanding construction sites. The diagonal brace is an essential part of the scaffold structure, helping to resist lateral loads and ensuring a secure working platform.
