Description

JUMBO Scaffolding Platform (aluminum / plywood)

The JUMBO platform (aluminium / plywood) without hatch is ideal for creating a secure and stable working surface on your scaffold. The platform is made from waterproof and non-slip Finnish plywood in pure birch, providing both durability and a safe surface for your tasks. The sturdy aluminium rails add extra strength, ensuring the platform can withstand demanding work conditions.

The platform's offset hooks allow for scaffold extension without causing misalignment, ensuring a smooth and secure platform even when the scaffold is extended. A patented storm lock is fitted on the underside, making it easy to secure the platform to all types of scaffolding, further enhancing safety during use.

Detail Images

Waterproof, non-slip, platform in Finnish plywood. Pure birch wood, mounted in strong aluminum profiles

Non-slip platforms equipped with staggered hooks, which makes lengthwise extension without displacement possible

Placed at each end under the platform, the patented storm locks are used to secure the platform to the scaffold

The set consists of
