Description

The JUMBO Roof Tile Platform is designed to hold a full pallet of tiles with a maximum load capacity of 1000 kg. It is ideal for use on roofs, where it can be adjusted in height to match the roof's pitch.

Technical Specifications:

Maximum load capacity: 1000 kg
Adjustable height: 50-80 cm depending on the roof pitch (min. 25° - max. 45°)
Dimensions: 100 x 86 cm

Note:
Before loading the roof tile platform, you should check the load-bearing capacity of the lath itself to ensure it can support the desired load. This is important to avoid damage to the lath and to ensure safety during use.

The JUMBO Roof Tile Platform is a robust and flexible solution for transporting and storing roof tiles on construction sites, requiring efficient material handling and adjustability for various roof pitches.
