Description

Robust arm (35 or 65 cm) in 32 x 32 mm profile in 3 mm wall thickness with double corner reinforcement for extra strength. The adjustable slide can be fixed anywhere on the arm, for stepwise adjustment of the distance to the handrail. End stop ensures that the sled cannot be pulled off completely.

The post holder is made of Ø42.40 pipe, with 3.25 mm wall thickness and thumbscrew for fixing the railing post. As a railing post, either a railing post for wooden railings (2200101) or for a steel railing (2200120) is used.

Detail Images

Can be used with JUMBO Railing post for steel railing - or JUMBO Railing posts for wooden railing. Space for mounting a foot kick with JUMBO Foot kick holder. Railing posts and foot kick holders are also used in JUMBO Bucket Scaffolding

Equipped with double corner reinforcement on arm for extra strength and stability

End stop on arm so that the sled does not slip off.

Both post holder and sled have thumbscrews for fixing offender posts
