Description

This horizontal brace, also known as a bone-shaped brace, is designed for JUMBO Rolling and Facade Scaffolds and is made from durable aluminium with a tube dimension of Ø50x2mm. The brace is equipped with extra-strong, fully cast claws at each end, ensuring a secure and stable attachment to the scaffold. The joints are fully welded to provide maximum strength and durability, making the brace ideal for demanding tasks where stability and safety are crucial. This horizontal brace is an essential part of your scaffold, contributing to a safe working platform.
