## Description

This Combiflex bracket without a horn is designed to extend the platform width on the JUMBO Combiflex scaffolding system. Please note that a handrail cannot be mounted on this bracket. It is ideal for situations where additional workspace is required, but a handrail is not needed. JUMBO Combiflex is an exceptionally robust façade scaffolding system, made from hot-dip galvanised high-quality steel, combining high strength with low weight. The scaffolding is highly flexible and can be constructed at any angle, 360 degrees around, with the ability to include up to 8 components at each node. The integrated diagonal bracing in the system ensures quick and efficient assembly and disassembly.
