Description

JUMBO Scaffold Net Offshore is a white, tightly woven net designed for effective screening of scaffolding, particularly suited for offshore applications. This net ensures that small items such as tools and building materials do not fall from the scaffolding, enhancing safety for both workers and bystanders.

The net is made of high-quality, wind-permeable material, which means it can withstand strong wind conditions without compromising stability. With a weight of 135 g/m² and dimensions of 3.20 x 50 m, this net is ideal for large scaffold structures.

JUMBO Scaffold Net Offshore can be easily secured with strips 21NBT100, ensuring quick and secure installation. The net is also UV-resistant, meaning it will not degrade with prolonged exposure to sunlight.

Specifications:

- Colour: White
- Material: Tightly woven and wind-permeable
