## Description

The JUMBO Universal Scaffold Pro with carpenter setup is designed to meet the high standards that professional craftsmen demand from their equipment. The scaffold is made of hot-dip galvanised high-quality steel, ensuring durability and robustness in demanding work environments.

The scaffolding is very versatile as it can be classified from scaffolding class 2-5 depending on what type of grating, platform etc. that is in use. A Scaffolding will always be classified depending on the lowest classified component.

The scaffold is constructed with 1 m internal columns, providing additional support and stability. It features wood/plastic ergonomic planks measuring 36.5x220 cm, offering a secure and comfortable working surface. For added strength, an extra row of beams is included, and the setup is secured with aluminium pipe fastenings.

The JUMBO Universal Scaffold Pro is supplied with one layer of planks, making it ready for use in a wide range of construction projects where safety and ergonomics are paramount.
