Description

The Giant Extension Ladder "Hyperlite" is designed for professionals who require a reliable and robust ladder for demanding tasks. Made from fibreglass composite, this ladder is both lightweight and exceptionally durable, making it ideal for prolonged and intensive use.

The Hyperlite is equipped with a self-locking clip system, making it quick and easy to adjust the ladder's length, saving time and increasing efficiency. To ensure correct positioning, the ladder rails are fitted with a built-in level, allowing you to always find the proper angle against the wall.

A unique feature of the green ladders in the Giant series is the sound signal on the bottom rung, alerting you as you approach the ladder's base, thus reducing the risk of injuries to the back, knees, and ankles. Additionally, the bottom rung on the Hyperlite also includes a level to ensure the ladder is properly aligned.

The ladder comes with practical stabilisers that can be individually adjusted, allowing compensation for uneven ground. The stabilisers are also equipped with sturdy pivoting feet that can be set in two positions depending on the surface, further enhan

Detail Images

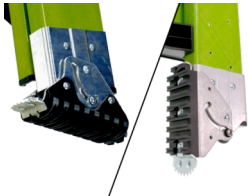

With Ground Cue® bottomrung signal. The Ground Cue signals the user when it is safe to dismount the ladder.

Convenient front-to-back angle level bubble helps ensure a correct setup angle

The convenient side-to-side level bubble, mounted on the lower step, helps ensure a safe setup.

Sure-set foot stays in position when you set it to either flat nonslip rubber shoe or spike mode for soft surfaces.
