Description

The JUMBO chimney scaffolding is a lightweight and robust scaffold made of aluminium, ideal for chimney work. Measuring 178 x 135 cm, it provides a stable and secure working platform. The chimney scaffolding can easily be hooked onto the roof ridge using the included ridgebraces, which are telescopic up to 1.50 meters. This allows the scaffold to be positioned further down the roof, offering additional flexibility and safety during work.

Detail Images

The set consists of

2 STK	2300117	Back brace top chimney 149 cm.	2 STK	2300115	Back brace bottoms - WIDTH 135 cm.
