Description

This frame is designed for use with the JUMBO Superflex facade scaffold, allowing for easy height extension. The Superflex facade scaffold is a versatile system offering numerous customisation options. The frame is made of fully welded aluminium with tube dimensions Ø50x4mm, ensuring a strong and stable construction. The impact-resistant, fully welded claws on the diagonals and handrails further enhance the scaffold's durability. Made from aluminium alloy 6005 T6, the frame combines high strength with low weight, making both assembly and disassembly quick and easy. This frame is an essential component for efficiently and safely building your facade scaffold to the desired height.
