Description

The JUMBO half platform (aluminium / plywood) is designed to provide a stable and secure working surface on your scaffold, even when space is limited. The platform is made from waterproof and non-slip Finnish plywood in pure birch, ensuring a durable and safe surface for your tasks. The sturdy aluminium rails add extra strength and stability, making the platform suitable for demanding work conditions.

The half platform's offset hooks allow for scaffold extension without causing misalignment, ensuring a smooth and secure platform. A patented storm lock is fitted on the underside, making it easy to secure the half platform to all types of scaffolding, further enhancing safety during use.

Detail Images

Waterproof, non-slip, platform in Finnish plywood. Pure birch wood, mounted in strong aluminum profiles

Non-slip platforms equipped with staggered hooks, which makes lengthwise extension without displacement possible

Placed at each end under the platform, the patented storm locks are used to secure the platform to the scaffold

The set consists of
