Description

This JUMBO platform with a hatch is designed to offer durability and functionality on the construction site. The platform is made of waterproof and non-slip Finnish plywood in pure birch, providing a solid and secure surface. It is mounted in strong aluminium side rails that add extra strength and stability. The hooks on the platform are offset, allowing the scaffolding to be extended in length without displacement. Underneath the platform is a patented storm lock that secures the platform and is compatible with all types of scaffolding, making it highly versatile.

Detail Images

Waterproof, non-slip, platform in Finnish plywood. Pure birch wood, mounted in strong aluminum profiles

Non-slip platforms equipped with staggered hooks, which makes lengthwise extension without displacement possible

Placed at each end under the platform, the patented storm locks are used to secure the platform to the scaffold

The set consists of
