Description

This scaffold clamp is designed for special solutions and securing overlapping decks, plates, and other components on your scaffolding. With a size of 175 x 55 mm and a practical bolt for tightening, this clamp ensures a secure and stable fastening of various materials.

The scaffold clamp is robust and durable, made from high-quality materials that can withstand the challenging conditions of the construction site. It is ideal for applications where precise and strong fastening of overlapping materials is needed, enhancing the safety and stability of the scaffolding.

Specifications:

Size: 175 x 55 mm

Function: Securing overlapping decks and plates

Application: For special solutions on scaffolding

Tightening: With bolt
