Description

The JUMBO Pro Roof Ladder is designed to provide safe access and stability while working on roof surfaces. The steps are strategically placed at the top of the side rails, ensuring they do not come into contact with roof tiles or sheets, providing a secure and comfortable working position. Mount the JUMBO Roof Ridge Hook (43TS001), which allows the ladder to grip onto the roof ridge. Additionally, two or more roof ladders can be connected using the JUMBO Ladder Connector (43TS003), making it easy to adjust the ladder to different roof sizes and shapes. This roof ladder is an essential tool for professionals working on roofs.

Detail Images

Steps placed to the front of the sidepiece so that they are free of waves on roof tiles
