Description

This Ergo wooden grating is made of spruce and designed with plastic spacers to reduce weight, making it easier to handle on the construction site. It is perfect for use as part of scaffolding or as a stable surface in muddy terrain. The grating is suitable for both indoor and outdoor use and can also be used for various furniture projects, where sanding may be necessary. Designed for Scaffolding Class 5, this grating can support up to 450 kg/m², ensuring high strength and durability under heavy loads.
