## Description

The JUMBO Universal Scaffold Pro with carpenter setup is designed to meet the demands of professional craftsmen working in challenging environments. The scaffold is made from hot-dip galvanised high-quality steel, providing long-lasting durability and resistance to corrosion.

The scaffolding is very versatile as it can be classified from scaffolding class 2-5 depending on what type of grating, platform etc. that is in use. A Scaffolding will always be classified depending on the lowest classified component.

The scaffold is built with the longest possible columns, offering extra height and stability, making it ideal for large construction projects. It features wood/wood standard planks measuring 48x220 cm, providing a secure and stable working surface. The bracket fastenings ensure a strong and reliable connection between scaffold components.

The JUMBO Universal Scaffold Pro is supplied with one layer of planks, making it ready for use and suitable for a wide range of tasks requiring a robust and dependable scaffold.
