Description

The Pro Facade Scaffolds Superflex is designed to meet the needs of professional craftsmen who require both strength and flexibility in their scaffolding system. The scaffold features strong and lightweight frames made from aluminum alloy 6005 T6, providing an optimal combination of high strength and low weight.

The frames are constructed with Ø50x4mm tubes and are fully welded, ensuring a stable and secure structure. This construction makes the scaffold ideal for demanding tasks where reliability is crucial.

Diagonals and handrails are equipped with impact-resistant, fully welded claws, further enhancing the durability and safety of the scaffold. This makes the Superflex system particularly suitable for both small and large construction projects.

The system is extremely flexible and offers many customization options, making it easy to adjust the scaffold to different needs on the job site. Additionally, it is quick and easy to assemble and disassemble, saving time and increasing efficiency.

The scaffold is supplied with JUMBO Scaffolding Platforms, which combine aluminum and waterproof plywood, ensuring a safe
