## Description

The JUMBO Universal Scaffold Pro is a professional solution designed to meet the demands of challenging construction projects. Made from hot-dip galvanised high-quality steel, the scaffold ensures durability and resistance to corrosion.

The scaffolding is very versatile as it can be classified from scaffolding class 2-5 depending on what type of grating, platform etc. that is in use. A Scaffolding will always be classified depending on the lowest classified component.

With 1 m inner columns and 2 m outer columns, combined with 3.00 m lightweight longitudinal beams, this scaffold offers both stability and flexibility. The platforms, made from wood/wood, measure 24.3x220 cm, providing a solid working surface. Additionally, the scaffold is delivered with an extra row of beams for a 1 m lift and aluminium tube fastenings, further enhancing stability. The maximum component weight is 15 kg, making it easier to handle and assemble on-site. The JUMBO Universal Scaffold Pro is ideal for construction projects where both safety and efficiency are paramount.
