Description

The JUMBO gangway is a versatile solution that can be mounted with the bottom either up or down, depending on the task requirements. The gangway can be adjusted to unlimited widths and equipped with railings on one or both sides for added safety. Additionally, it can be installed with a 15-20% incline when ceiling-mounted, offering flexibility in various work situations. If the gangway needs to be locked in place, a BRO-lock can be purchased for additional stability.
