Description

The JUMBO Scaffolding Pro Double Towers AGR is the perfect choice for professional craftsmen who require flexibility and stability in their work tasks. The scaffold is specifically designed for 2 m planking, with a maximum height of 3.40 m to the first platform and 2.25 m between subsequent platforms, making it ideal for larger projects.

This scaffold is equipped with the advanced AGR guardrail, featuring built-in diagonal bracing to ensure optimal stability and safety. The claws on the diagonals and guardrails are made from high-impact, fibreglass-reinforced plastic, providing extra durability and strength.

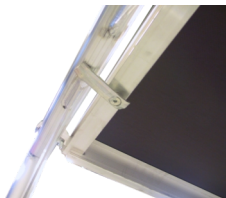

The scaffold platforms are made from waterproof, non-slip Finnish birch plywood, mounted in strong aluminium frames. The staggered hooks on the platforms allow for lengthwise extension without displacement, and the patented storm lock underneath ensures that the platforms stay securely in place under all weather conditions.

As standard, JUMBO Scaffolding comes with Ø125 mm castors with brakes. The castors feature a durable polyurethane coating, making them resistant to solvents and wear. The castors can be replaced with larger Ø200 mm castors with brakes a
