Description

The Giant Platform Ladder "Fortress" is specifically designed for professionals who require a reliable and safe ladder for their work. Made from fibreglass composite, this ladder is lightweight yet strong, and its non-conductive material increases safety when working near electrical installations.

The platform, measuring 48.8 x 45.5 cm, is spacious and sturdy, making it ideal for tasks that require prolonged standing. The toe boards on the sides of the platform ensure you can stand securely and comfortably. The self-locking safety rails provide protection on all sides, allowing you to focus on your work without worry.

The Fortress ladder is also equipped with a handrail that provides extra support and helps you maintain balance easily. As an added safety feature, the ladder includes a built-in sound signal on the bottom rung, alerting you when you are nearing the base, helping to prevent injuries.

At the top of the ladder, you'll find a multi-functional tool tray. This tray is designed with holes, magnetic indentations, and a lockable compartment in the centre, making it an indispensable tool for even the most demanding tasks.

Detail Images

An audible signal on the bottom rung helps prevent back, knee and ankle injuries caused by inattention to the last rung of the ladder.

Large platform 48.5x45.5 cm for extra comfort and safety, even for longer tasks.

Practical tool tray with holes for various tools, magnetic areas and a small compartment with lid.

Self-closing safety hoops ensure you are secured all around.
