Description

The JUMBO Super Pro Straight Ladder is designed for professionals who need a reliable and durable ladder for their daily tasks. With a width of 44 cm, this ladder provides increased stability and safety. Made from 6005-T6 aluminium, the ladder combines strength with lightweight properties, making it easy to handle and transport.

The ladder features 38 mm ergonomically angled, non-slip rungs that ensure a flat and secure standing surface, even during extended use. The rails and rungs are anodised to prevent dirty hands and extend the ladder's lifespan. For added stability and safety, the ladder comes with a ladder foot featuring non-slip, durable feet.

Note: To comply with EN131-Professional standards, straight ladders should be chosen with the included ladder foot, especially for ladders over 3 meters in length.
