Description

The Giant Step Ladder "Mightylite" is crafted for professionals who demand high quality and durability from their tools. Made from fibreglass composite, this ladder offers a unique blend of strength and lightness, making it easy to handle without compromising on stability.

The ladder features a spacious platform measuring 32 x 32 cm, which, along with the safety bar, makes it ideal for tasks requiring prolonged standing. The hidden handle in the platform simplifies folding, saving time and effort.

For added convenience, the ladder comes with a practical multi-tray at the top, where tools such as hammers and screws can be safely stored. A unique feature of the green ladders in the Giant series is the built-in sound signal on the bottom rung, which helps prevent injuries by alerting the user when they are about to reach the bottom of the ladder.

Detail Images

Equipped with practical multi-use tool tray on top of the railway.

With Ground Cue® bottomrung signal. The Ground Cue signals the user when it is safe to dismount the ladder

Nonconductive fiberglass construction provides additional safety while working around electricity.
