Description

The Giant Telescopic Multi-use Ladder "Conquest Aluminium" is a versatile and strong ladder designed for professionals who require a combination of durability, flexibility, and lightweight performance in their equipment. Made from high-strength aluminium, this ladder offers a robust construction with excellent corrosion resistance while remaining easy to handle.

Key Features:

Quad-Lock™ hinge system: A smart handle system that makes it easy to operate the hinge lock, ensuring maximum stability and flexibility in ladder use.

Angled rungs: Provide an ergonomically correct working position, with a rung width of 25 mm in single-rung mode and 80 mm when the outer and inner ladder rungs align.

Rapid Lock® rotary lock: Allows quick and easy adjustment of the ladder length, ensuring efficient transitions between different ladder configurations (extension ladder, step ladder, etc.).

Telescopic stabilisers: Enable use on uneven surfaces by allowing individual adjustment of the stabilisers' length.

Non-slip feet with spikes: The feet have a non-slip surface and a small spike that can be tilted down to ensure stability on loose

um”

Detail Images

Practical work tray with a magnetic compartment. Plenty of space for all kinds of tools

Angled steps ensure a plane standing ground. Single step width 25 mm - when steps on the inner and outer ladder are in line the total step width is 80 mm.

Constructed from high strength aluminium with great corrosion resistance - gives a strong and sturdy yet light ladder

Quick and easy extension with the solid turn-lock Rapid Lock® for adjustment of ladder length.
