Description

The Pro Telescopic Step Ladder is perfect for those who need a compact and easily transportable ladder. Made from sturdy 6061 aluminium, the same alloy used in the aerospace industry, this ladder is both exceptionally strong and lightweight. The anodised surface prevents dirty hands during use. The ladder extends step by step, with 90 mm wide ergonomic rungs made from solid aluminium profile for comfort and safety. It also features fixed ladder feet that ensure stable positioning. When folded, the ladder takes up minimal space and can easily fit into a standard car boot. This telescopic ladder is the ideal solution for professionals requiring a reliable ladder for daily use.
