## Description

The JUMBO Scaffolding Pro Single Towers is a professional aluminium scaffold, specifically designed for 4 m planking. It is ideal for craftsmen who require a flexible and strong scaffold for larger construction and maintenance tasks.

4 m planking: Maximum height to the first platform is 4.40 m, with a distance of up to 4.00 m between subsequent platforms, making it perfect for working at elevated heights.

The scaffold's frames feature fully welded joints, ensuring additional strength and stability during use. Diagonal braces and guardrails are equipped with high-impact, fully cast claws at each end, providing added durability and robustness. The fully cast claws guarantee that the joints remain strong over time.

The platforms are made from waterproof, non-slip Finnish birch plywood, mounted in strong aluminium frames. The staggered hooks on the platforms allow for lengthwise extension without displacement. Underneath the platforms, a patented storm lock secures the decks, preventing movement during adverse weather conditions.

As standard, JUMBO Scaffolding is supplied with extra sturdy Ø125 mm castors with brakes, ensuring easy and safe mobility.
