Description

This scaftag insert is an essential safety element for scaffolding, filled with information such as what the scaffolding is intended for, load class, erection date, and inspection date. The sign is designed to meet the requirements of AT-Guideline 45.1, point 1.15, and must be placed at access points on fixed scaffolding over 2 meters high.

The safety sign is made from durable plastic material that can be reused, making it an economical and practical solution. By using this sign, you ensure that all necessary information is visible and accessible to workers and inspectors, contributing to maintaining a safe workplace.

Specifications:

Material: Durable plastic, reusable

Function: Filled with load class, erection date, and inspection date

Placement: At access points on scaffolding over 2 meters high

Requirement: According to AT-Guideline 45.1, point 1.15
