Description

This special key is designed for tightening and loosening Special Coupler 35BH111, used with JUMBO construction site fences. The special key is an essential component to ensure that the couplings can only be adjusted by authorised personnel, providing extra security on construction sites and at events.

With this key, you can easily and quickly ensure that your fence modules are correctly fastened and remain stable under all conditions. The special key is made from durable materials to ensure long-lasting use and reliability.

Specifications:

Model: Key for Special Coupler 35BH111

Application: Tightening and loosening special couplers on JUMBO construction site fences

Material: Durable materials for long-lasting use

This special key is an essential part of the security system for JUMBO construction site fences, ensuring that the couplings can only be manipulated with the appropriate tool.
