Description

This JUMBO half platform is designed to deliver both durability and safety on the construction site. The half platform is made of waterproof and non-slip Finnish plywood in pure birch, mounted in strong aluminium side rails for maximum strength and reliability. The offset hooks on the half platform allow for scaffolding extension in length without displacement, providing added flexibility. Underneath the half platform is a patented storm lock that secures it to the scaffold and is compatible with all types of scaffolding.

Detail Images

Waterproof, non-slip, platform in Finnish plywood. Pure birch wood, mounted in strong aluminum profiles

Non-slip platforms equipped with staggered hooks, which makes lengthwise extension without displacement possible

Placed at each end under the platform, the patented storm locks are used to secure the platform to the scaffold

The set consists of
