Description

This JUMBO half platform without a hatch is designed to provide reliability and safety on the construction site. The half platform is made of waterproof and non-slip Finnish plywood in pure birch, mounted in strong aluminium side rails for increased strength and durability. The hooks on the half platform are offset, allowing the scaffolding to be extended in length without displacement. Underneath the half platform is a patented storm lock that secures it to the scaffold and is compatible with all types of scaffolding.

Detail Images

Waterproof, non-slip, platform in Finnish plywood. Pure birch wood, mounted in strong aluminum profiles

Non-slip platforms equipped with staggered hooks, which makes lengthwise extension without displacement possible

Placed at each end under the platform, the patented storm locks are used to secure the platform to the scaffold

The set consists of
