Description

This foldable bracket is specifically designed for the JUMBO Flex Facade Scaffold and allows for the extension of the platform width, while also featuring horns for railing installation for added safety. The bracket is easy to assemble and disassemble, making it ideal for flexible work conditions where quick adjustments are necessary. The JUMBO Flex Facade Scaffold is known for its versatility and robust construction with fully welded frames in tube dimensions Ø50x2mm and impact-resistant claws on diagonals and handrails. Made from aluminium alloy 6005 T6, this bracket offers both high strength and low weight, making it a reliable solution for securely extending the scaffold platform.
