Description

This railing post is specifically designed for use with Combiflex brackets with a horn and is used to establish a secure handrail on the scaffold. The post allows for easy and safe installation of the handrail, enhancing the safety of workers on the platform. JUMBO Combiflex is an exceptionally robust façade scaffolding system, known for its combination of high strength and low weight, made from hot-dip galvanised high-quality steel. The scaffolding can be constructed at any angle, 360 degrees around, and can support up to 8 components at each node. The integrated diagonal bracing in the system ensures quick and efficient assembly and disassembly.
